PLEASE TURN PAGE OVER

Tuberculosis screening: While the vast majority of children in the U.S. have little or no risk of becoming infected with tuberculosis, a few children may be at increased risk and should have a tuberculin skin test done. Please answer the following questions to help us determine your child's risk factors.

Yes___No___ Is the child in close contact to a person sick with active TB disease?

Yes___No___ Does the child have or is at risk to have HIV?

Yes___No___ Was the child or the child's parents born outside of the United States?

Yes___No___ Is the child exposed to a person in jail or a person who has been in jail in the past five years?

Yes___No___ Is the child exposed to a person who has HIV, who is homeless or who lives in a nursing home or another group home?

Yes___No___ Is the child exposed to drug users or migrant farm workers?

Yes___No___ Does the child have a health problem that lowers the immune system?

Yes___No___ Does the child live in a community that has a high risk for TB?

Yes___No___ Has the child traveled to or had a visitor from any foreign country since the last visit?

Yes___No___ Does the child have any symptoms of TB (cough, fever, night sweats, loss of appetite, weight loss, or fatigue) or any abnormal chest x-ray?

Urinalysis: This is a routine screening for signs of infection, kidney disease and diabetes. Screening is done once between ages 3 and 5 and at all adolescent check-ups.

Yes___No___ Any concerns regarding your child's urine today?
